

# Bringing It All Together

**Survik**  
Software Ltd.

---

**Survik Software Limited** is a global provider of IT and software services. We focus exclusively on maximizing client returns from outsourcing and off-shoring. We have extensive experience in developing and managing complex IT applications in real time as well as in providing high value services.

Our proprietary ISO methodology and strategic partnership with global IT leaders fully complements and strengthens our service spectrum and facilitate us to operate as an enterprise-class solution delivery company. Survik executes projects with the expertise in software engineering, process management, application, architecture design and technology solution that will meet your business objectives and criteria for success. Our solutions aim to provide high value by optimizing cost of ownership of technology investments for customers.

### Mission

Be a leader in providing knowledge based niche services for IT and Business Process outsourcing to customers worldwide.

### The Vision

Strive towards adding value to clients, employees, and partners to attain continued success.

### Our Beliefs:

- ⌘ We believe that the knowledge based economy will continue to evolve and our business will thrive only if we can identify, specialize and become an expert in emerging technologies. We must always be in a position to act as a catalyst in our clients' success by helping them adapt to technological changes.
- ⌘ We believe that employees are the lifeline of our company and they are our most critical and valuable resource. We are committed to attracting and retaining talented employees by helping them achieve their professional, financial and personal goals.
- ⌘ We will always be successful in adding value to our clients if we keep their interests at the core of our services.
- ⌘ We can only be successful as an institution if we treat our corporate relationships with integrity and respect. Our eventual success will depend on the success of our clients, employees and partners.

“ SCALING NEW HEIGHTS IN IT CONSULTING  
AND SOFTWARE SERVICES ”

## Our Services Delivery Model

We offer software consulting and development services on platforms such as .Net, ASP, PHP, Visual Basic, C#, Oracle, SQL-Server, DB2, Actuate, SAS, Crystal, Business Objects, SAP-BW, MSRS, Data warehouse & Business Intelligence applications, GIS etc. We help our clients in custom application development including database, GUI, reporting and business intelligence using various technologies. We work on areas including architecture, design, development, administration, implementation, maintenance.

Survik's Offshore Services go beyond simply executing software development projects from our offshore development center. It represents a tailor-made program that suits the clients' business requirements in terms of their preparedness, cost issues, time frame, confidentiality and other relevant issues. Onsite coordination is a very critical factor when it comes to offshore services. We offer consulting and contracting services in various fields of Information Technology. We adopted the onshore/offshore model to optimize efficiency, quality and cost where it Survik deploys part of the project resources onsite wherever necessary. These resources are dedicated to communication with the end-users, study and analysis of the business, the creation of test plans and integration testing which is very crucial for the successful implementation of the project.

The proven Survik Program and Project Management (SPPM) and ISO 9001 based Survik Quality Methodology (SQM) ensure that our clients' business requirements are thoroughly met, while seamlessly integrating various technologies. Survik executes projects with the expertise in software engineering, process management, application, architecture design and technology solution that will meet your business objectives and criteria for success.

All applications are developed with post-implementation issues in mind. All developments take into consideration strict quality standards, enable cost-effective operations and support easy adaptations to the modifications in the future. During the post-implementation phase, a team of SURVIK consultants is placed at the client site for smooth transition of knowledge. This includes training and a detailed walk through of the operations documentation and clarification of questions.
